Application for PRC Owners – Ports Position

CPARB,

I'm pleased to submit my application for the seat on the Project Review Committee (PCR) representing Owner, Ports. I am grateful for this opportunity to sit on the PRC and assist the community in this vital work. I have nearly 20 years in construction management with nearly all those years working for the Port either as a consultant or as an FTE. I have worked on various alternative public work (APW) projects throughout my career at the Port:

GCCM

Shilshole Bay Marina
Concourse C Expansion
Post IAF Airline Realignment
Primary Fire Station Upgrades
Club @ SEA – Concourse A

DB/BES

D Annex
Interim Westside Fire Station
Concourse B Exit Lanes Breach Control

I started working groups at the Port of Seattle (Port) for both Design-Build and GCCM to help share knowledge with various Port departments (Central Procurement, Project Management, and Construction Management to name a few) and continue the Port's development of a robust APW program. In addition, I am DBIA Associate, and I have gone through AGC's GCCM training. I have also provided feedback on the latest CPARB GCCM best management guide. It would be my delight to use my experience as member of the project review committee. Thank you.
