Re: Public Body Design-Build and GC/CM Recertification Determination

Dear Director Lanier:

The Project Review Committee has determined that Sound Transit has met the criteria established in RCW 39.10 for public body Design-Build (DB) certification combined with GC/CM certification. As of March 28, 2024, the Sound Transit is authorized to utilize DB and GC/CM contracting procedures for projects with a total project cost of two million dollars or more for a period of three years.

Due to the nature of combining these certifications which had a 10-month gap between their expiration dates, Sound Transit's new certification date for both alternative delivery methods will now extend through **May 28, 2027**. Please submit your application for recertification to the Project Review Committee three months prior to the above noted expiration date.

Congratulations on the approval of your application.

Sincerely,

A handwritten signature in blue ink, appearing to read "Kyle Twohig", is written over a blue ink scribble.

Kyle Twohig, Chair
Project Review Committee
