RE: GC/CM

7/4/2020

Dear Jay, please use this letter as a reference document on the upcoming review of your Agency Status.

N.A. Degerstrom (NAD) has worked with the CVSD in Spokane Valley on a Heavy Civil GC/CM project to replace 2 natural turf playfields, with artificial turf. Through this project the CVSD proved that they are organized, well managed, and very knowledgeable of construction projects of this scope and more.

NAD enjoyed working through the design processes and then the subsequent construction of the fields. The process was seamless for us as the GC because we had a great team at CVSD to work with. The team was engaged, and transparent through the entire process. When issues or questions arose the CVSD team responded quickly with intelligent questions to examine all options for success, we then worked together to find the best resolution to any challenges that came along.

NAD looks forward to the opportunity to work with the CVSD in the future. We recommend that they retain their Agency Status, as they have proven they are capable and skilled at managing GC/CM projects.

If you have any questions please feel free to reach out for clarification.

Regards,

Benjamin E. Clifford
