U.S. Bank Voyager® Maintenance Solution

Properly maintaining fleet vehicles not only keeps drivers safe, it keeps your business moving. The Voyager Maintenance Solution does both and helps fleets to easily manage routine maintenance and emergency repairs with built-in controls and access to granular details for all work performed. For the first time, maintenance expenses can be fully integrated with fuel purchases for holistic visibility across your Voyager Fleet Program and into the total cost of ownership. The Voyager Maintenance Solution delivers innovative, cardless payments and:

Enhanced data and controls – Establish the parameters for all maintenance performed on your vehicles from aligning routine repairs to match manufacturer’ specifications to allowing specified emergency repairs. All maintenance requests follow automated workflow and authorization processes so that you can more effectively manage expenses without surprises.

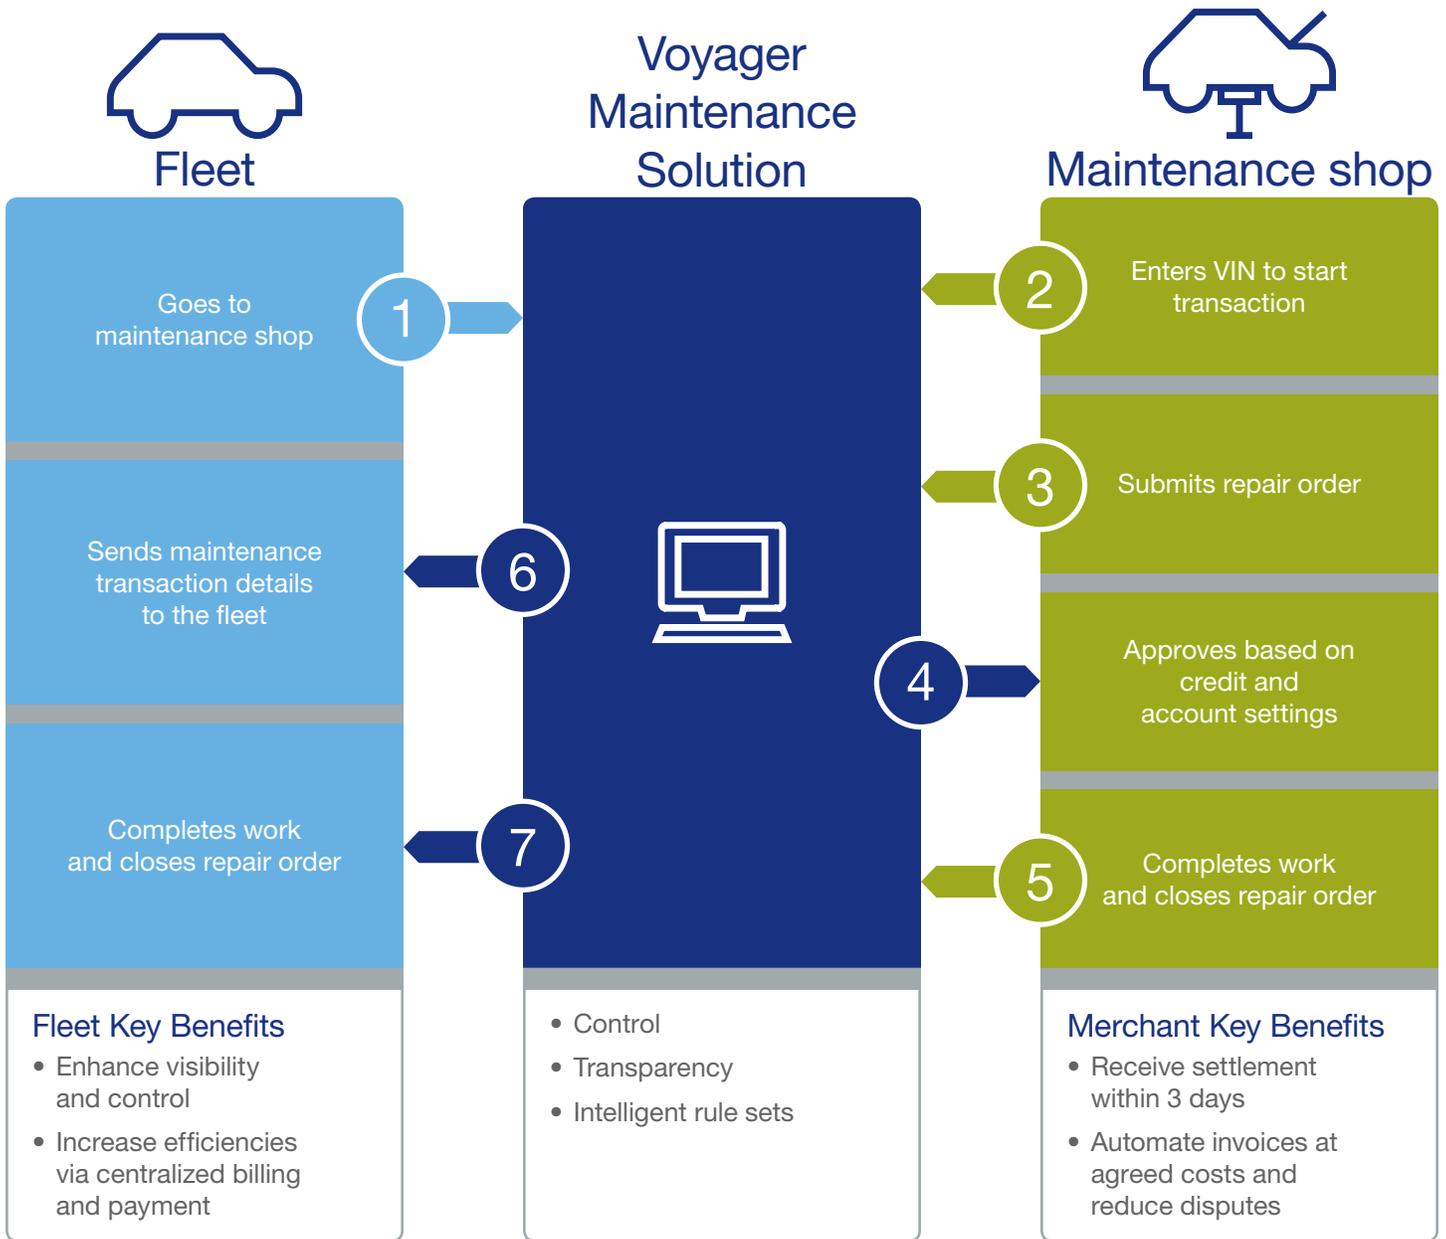

Increased cost savings and efficiencies – Get discounted pricing at select merchants nationwide and drive additional efficiencies. Fleet managers not only can control when and where maintenance is performed, they can choose to have maintenance performed by providers with discounted pricing, either directly negotiated or offered via Voyager.

Centralized program and billing – Manage a single bill reflecting all fuel and maintenance expenses, simplifying overall fleet management.
