PRT issued a Work Request for Print Assessment Services for the Board of Industrial Insurance Appeals (BIIA) on 2-27-09 with an opening date of 3-20-09. The work request went to five vendors, each approved as a viable resource as determined under the master contract.

PRT received one response to the work request. The response was acceptable to BIIA. Approval to move forward with the response took longer than anticipated and the master contract expired.

The purpose of the Print Assessment is to identify current print practice of BIIA and where these practices can be changed to reduce spend. The Print Assessment offers guidance on printer functionality, placement, and replacement to allow an agency to know their total cost of ownership. Agencies understanding what they are spending on print is the first step to consolidate and change print practice in order to reduce overall spend.

The response received from the Work Request issued, provides the methodology PRT and BIIA is seeking to obtain an accurate Print Assessment study.

DEPT. OF ENERGY GRANT NAMED

Conduct a 3-day paper machine evaluation utilizing the USDOE-funded Energy Scorecard System for:

1. Gray's Harbor Paper mill on March 11-13, 2009, and
2. Port Townsend Paper mill on March 16-18, 2009

Activities include related pre/post assessment assistance, support to mill staff for completing Scorecards for each paper machine, a 2.5 day visit at each mill to discuss the Scorecards, monitoring of the machines to observe equipment and operating practices, and an exit meeting reviewing energy performance, preliminary recommendations, and examples of what other paper companies with similar problems have done to reduce energy consumption.

A follow-up report summarizing onsite activities will be presented to each mill, with prioritized recommendations and projected energy savings, and other information to assist the mill in reducing energy consumption.

Accepted

Start Date: 4/4/2008  
End Date: 10/31/2009  
Reporting Date: 4/1/2009

GRANT NAMED INDIVIDUAL

The contractor will develop CGE models of four states (Washington, Oregon, Alaska and Idaho), and a CGE model of the Pacific Northwest (PNW) region (Washington, Oregon, and Idaho) as a whole, to be used to estimate regional effects of increased biofuels production and utilization, and describe how various levels of state biofuel production would impact each state and broader regional economies.

The contractor will construct regional CGE models for each state and for the combined three-state PNW region using IMPLAN, GAMS, and aggregation routines developed by Holland and Stoddick. The contractor will gather cost data for biofuel production and translate the data into producer price terms for incorporation in the CGE models. The contractor will also incorporate estimates of the substitutability of biofuels for fossil fuels in regional production and consumption in the CGE models.

DANIEL H BREIDENBACH  
9506 REDBUD LANE  
LENEXA, KS 66220-

Reporting Date: 4/1/2009

GRANT NAMED INDIVIDUAL

Danny Breidenbach will serve as a consultant to assist with technical aspects of the analysis. He specifically will conduct a series of equating studies of the test forms, confirmatory factor analyses and other test score validity studies. He will assist with the writing of the manual as it relates to such analyses. He also will be available for general consultation on technical matters as revisions progress.

The purpose of this amendment is to manage the continuing needs of the Washington State "Poetry Out Loud" (POL) program, including wrap-up and evaluation of the 2008-2009 program and advance planning and preparation for the 2009-2010 program. The original contract supported the hiring of a contractor to coordinate the 2008-2009 Washington State POL program, which is supported entirely by federal funds through the National Endowment of the Arts (NEA). This NEA funding is restricted and may be used only for POL and will be lost if we do not use it to produce a state level POL program.

The Family Forest and Fish Passage Program (FFFPP) utilizes contract engineers to provide engineering services including site surveys, designs, hydraulic calculations, permit information, and construction oversight to funded projects. Each round of funding projects are assigned to one of four prescreened engineers to provide these services to the sponsor. This cost increase, in the amount of \$59,207 will allow Waterfall Engineering to provide a full range of services as described in the scope(s) of work (attached in PRISM) for the following projects: 08-1496, 08-2127, 08-2066.
