Improve Facilities & Control Costs

Clients can better control utility and operating costs, improve work conditions and reduce environmental impacts through a Resource Conservation Management Program (RCM).

RCM is a coordinated and continuous effort to manage the energy, water and solid waste costs associated with facility operations. By tracking utilities and paying attention to facility use, RCM strategies improve operations and maintenance (O&M) and inform capital improvement plans.

SCALED SERVICES TO MEET YOUR NEEDS

Our team of experienced, professional RCM consultants partner with your facility managers to develop a customized plan that meets your needs and budget. We can:

- Establish data management and provide analysis so you can make informed decisions
- Identify and implement utility efficiency improvements
- Recommend Best Practices for O&M and planning
- Develop and implement an action plan
- Evaluate effectiveness – monitor, re-assess, and adjust plans to sustain savings

WE SERVE

- Cities and Towns
- Colleges and Universities
- Counties ■ Health Districts
- Hospitals ■ Libraries
- School Districts ■ Port Districts ■ State Agencies
- Other Public Agencies (Parks, Public Utilities, Fire Districts, and Public Transits)

Let us help you reduce your utility costs!

RCM PROVIDES VALUE

Our program is designed to achieve a return on investment within the first few years. By controlling utility consumption, you can:

- Realize up to 15 percent saving.
- Improve the working and learning environment.
- Reduce your environmental impacts.
- Meet carbon reduction goals.
- Be a good steward of public funds

2 YEARS

average time to recoup costs through the RCM program

15%

potential savings realized through the use of the RCM program

OUR STORY

IMPLEMENTING RCM WORKS!

By implementing an RCM in 2007 on the Capitol Campus, DES was able to reduce consumption by more than 40%. This effort helped us reduce water consumption, garbage into landfills, and our carbon footprint.
